

ABSTRACT OF THE DISCLOSURE

A gaming machine has a display and a game controller arranged to control images of symbols displayed on the display. The game controller is arranged to play a game wherein at least one random even is caused to be displayed on the display and, if a predefined winning event occurs, the machine awards a prize. If in the game, a plurality of die symbols are present on the display, the die symbols reveal outcomes, at least one of which results in the awarding of a feature.
